

AMENDMENTS TO THE CLAIMS

The listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (currently amended) A method in a computerized system for building a quote for a piece of equipment comprising:

(a) displaying on a client side one or more pre-engineered specifications for the equipment to be quoted;

(b) electronically soliciting from a user a selection of one pre-engineered specification;

(c) soliciting from the user a selection of a manufacturer of a first component of the pre-engineered specification;

(d) displaying options and quoted prices for the user at the client side for the first component and allowing the user to select one or more options for the same, the act of displaying options and quoted prices including updating the displayed options and quoted prices after an interrelated option has been selected; and

(e) generating a report at the client side showing the options selected for the first component and a quoted subtotal cost for the component.

2. (Original) The method of claim 1, further comprising repeating acts (c) through (e) for a second component.

3. (currently amended) The method of claim 1 further comprising generating a report showing the components selected and the quoted cost of the first component, the second component, and the total quoted cost of the equipment.

4. (Original) The method of claim 1 wherein displaying the pre-engineered specification includes displaying an approximate price for that pre-engineered specification.
5. (currently amended) The method of claim 1 wherein displaying options and the quoted prices for the first component includes displaying those options that are available from the selected manufacturer.
6. (currently amended) The method of claim 3 1 wherein the quote is for a lease.
7. (currently amended) The method of claim 3 1 wherein the quote is for a purchase.
8. (currently amended) A method in a computerized system for building a specification for a truck comprising:
 - electronically soliciting from a user a selection for a truck class;
 - soliciting from the user a manufacturer of a pre-engineered chassis of the truck;
 - displaying chassis options and quoted prices for the chassis and allowing the user to select one or more chassis options, the act of displaying chassis options and quoted prices including updating the displayed chassis options and quoted prices after an interrelated chassis option has been selected;
 - soliciting from the user a manufacturer of a pre-engineered body of the truck;
 - displaying body options and quoted prices for the body and allowing the user to select one or more body options, the act of displaying body options and quoted prices including updating the displayed body options and quoted prices after an interrelated body option has been selected; and
 - generating a report showing the chassis options selected, the body options selected, and a total quoted cost for the truck.
9. (Original) The method of claim 8 wherein the chassis options include one or more of the group consisting of wheel base options, engine options, and transmissions options.

10. (Original) The method of claim 9 wherein the chassis options include one or more of the group consisting of fuel tank options and cab options.
11. (Original) The method of claim 12 wherein the body options include van body size options.
12. (Original) The method of claim 11 wherein the body options include one or more of the group consisting of roof options, cargo control options and interior liner options.
13. (currently amended) The method of claim 9 further comprising displaying chassis options and quoted prices, including displaying a subtotal quoted price for the chassis.
14. (currently amended) The method of claim 9 further comprising displaying body options and quoted prices, including displaying a subtotal quoted price for the body.
15. (currently amended) A method in a computerized system ~~of doing business~~ for generating quotes for leased equipment, the method comprising:
 - electronically storing an at least one pre-engineered specification for a piece of equipment on a server;
 - allowing access to the stored specifications by a user;
 - electronically soliciting from the user a selection of one specification stored on the server;
 - displaying to the user one or more options and a quoted price relating to the selected specification;
 - receiving from the user one or more selected options;
 - updating the one or more options and the quoted prices after each of the one or more options is selected by the user; and
 - displaying to the user a the price quote for the selected specification and the selected options.

16. (Original) The method of claim 15 further comprising displaying specifications relating to one or more manufacturers of the piece of equipment.

17. (Original) The method of claim 16 further comprising displaying a link to a server wherein information from the manufacturer may be accessed.
